

SMART Goals example:

S—Draw a trail map of a local woods, including scale and all turns and options for walking, as well as some of the plant life.

M—The map will include the entire trail area and at least 10 points of interest.

A—The map will use other applications as a start and will be a simple version that is printable to provide at the trail and on the website.

R—The map will include just enough detail to keep people from getting lost.

T—The map will be available by the end of October.
