

Family Letter

Dear Family,

The students are soon to be involved in a service-learning project that greatly enhances their academic and social learning as they give of their time, talent, and treasure for the common good. The plan is to investigate composting food waste as an earth-friendly practice. This ongoing project covers all their subject areas: science, mathematics, reading, writing, and social studies.

Learning about the production of usable compost from which edible and nonedible plants can be grown is something that can benefit our students and families.

We eagerly look forward to your involvement as we share further information and send home student/family activity(s) throughout the year.

Thank you so much for your support.

Sincerely,
