

Master Plan Scoring Guide

This project will include three separate grades: one for the meeting notes, one for the blueprint, and one for the final product.

Scoring for the meeting notes: 4 points:

- Must include a detailed list for all businesses within the community.
- Must include rationale for each of the businesses listed.
- Must include a detailed list of businesses (not included) that are available in a neighboring community.
- Must include information regarding the distance and travel time for each of the businesses you listed which are provided by a neighboring community.
- Clearly written, good quality.

Scoring for the blueprint: 4 points:

- All information included on the blueprint should be represented through color or symbols. (You may use a combination of each)
- Must include a full layout of the mile square plot, including land that may be vacant.
- Must include at least one landform (lake, river).
- Must include a clearly drawn plan representing the infrastructure; roads, railroads, power lines, and phone lines.
- Must include land areas allocated for each of the following zones; residential, Industrial, special services, and commons areas. (Refer to instruction sheet for information regarding zones).
- Must include a key containing color used for all of the above information.
- Clearly written, good quality.

Scoring for 3-D communities: 4 points:

- Must be 3-D.
- Includes all above information; including infrastructure, zoning areas, and buildings.
- Is a sound design, is neatly constructed, and is good quality.
- Shows creativity

The following guide refers to scoring on each of the above assignments.

3 Points	2 Points	1 Point
Has all elements for 4 points, but details are missing and/or quality is not good.	Is missing a couple of the required elements and/or quality is poor.	Has several missing elements and is poor quality.
