Introductory Version Game Sequence

The following is the sequence of the 28 terms and concepts built into Philanthropy EconAround Bingo - Introductory Version. The logic of this sequence is designed so that both philanthropy and economic terms and concepts build on each other in a spiraling level of complexity, beginning with Benefits and ending with Wants. Of course, the game can be started at any point in the sequence and continue around to where it first began. Keep this handy as a reference document while the game is being played so the next expected response from the students can be anticipated by the teacher.
