

# Random Acts of Kindness

By Rick Kelley

1st Rap Verse:

It starts like this, it's really quite simple  
the world's getting crowded, getting crammed with people  
all struggling each day to just get by,  
if we're gonna get together we've got to all try  
to look beyond ourselves, and help each other  
treat everyone you meet like a sister or a brother  
and give out the love, give out the peace,  
you'll find that giving is a sweet release  
from stress, and pain and struggle and strain  
and all those troubles that we all share  
you'll find the cure is to care

2nd Rap Verse:

You know contagious, like when you've got a cold  
and you're sneezing and coughing, got a runny nose  
and before you know it, your whole family's got it  
before you know it, all your friends got it  
before you know it, your whole school's got it  
before you know it, ...I think you've got the point  
imagine that kind of multiplication  
with something real positive sweeping the nation  
We just do it, that's the best way to start  
doesn't cost anything when it comes from the heart  
It could happen, it all begins with you  
What are you willing to do?
